PROFESSIONAL PROFILE

Experienced Data Analyst with deep expertise in data analysis and visualization. Proficient in SQL, Python, Excel, and Power BI, with advanced skills in statistics, database management, and solving complex problems. Able to translate complex data into strategic insights and communicate effectively with diverse audiences, including non-technical stakeholders.

KEY SKILLS

- | | | |
|--|-------------------|--------------------|
| • Data Analysis | • Analytics | • Communication |
| • Data Visualization (Power BI, Tableau) | • Problem Solving | • Collaboration |
| • Statistics | • Excel | • Time Management |
| | | • Machine Learning |

PROFESSIONAL EXPERIENCE

Accenture

February 17, 2024 - March 15, 2024

Simulation in Data Analysis and Visualization at Accenture North America on Forage

I conducted a simulation focused on advising a fictitious social media client as a Data Analyst at Accenture. I cleaned, modeled, and analyzed 7 datasets to uncover content trends for strategic decision-making. I prepared a PowerPoint presentation and a video presentation to communicate key insights to the client and internal stakeholders.

November 8, 2023 - January 26, 2024

Qu'Antium

Job simulation in data analysis at Quantum on Forage

I completed a role simulation focused on data analysis and business insights within the data science team. I developed expertise in data preparation and client analysis, using transactional datasets to extract valuable insights and formulate data-driven business recommendations. I enhanced my analytical capabilities to identify benchmark stores for conducting uplift tests on pilot store layouts, enabling evidence-based decision-making. Leveraging insights from previous projects, I generated comprehensive reports for the Category Manager, facilitating informed strategic decisions and enhancing business applications.
